

## RING SIZE GUIDE

Before you measure your ring size, ensure that you print out these instructions on a piece of A4-size paper (in the print settings: 100% or actual size). You can check the accuracy of the

printed document by placing a credit card in the box shown above. If the card matches the shape of the box exactly, then you can start measuring.

### OPTION 1: RING COMPARISON

To find the right PAUL HEWITT ring size for you, place a ring that fits you on the circles below and read the corresponding size. Important: The ring should match the shape of the respective circles as well as possible. If the ideal fit for you lies between two sizes, we recommend you select the larger one.

15.90 mm

Size 50

16.20 mm

Size 52

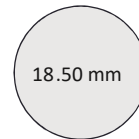

17.20 mm

Size 54

17.80 mm

Size 56

18.50 mm

Size 58

### OPTION 2: RING SIZING RULER

First cut out the ruler shown below. Wrap the ruler around your finger, then pull the pointed end through the slit and read your ring size. If the ideal fit for you lies between two sizes, we recommend you select the larger one.
